Python 3.7.0

Release Date: June 27, 2018

Note: The release you are looking at is **Python 3.7.0**, the initial **feature release** for the legacy 3.7 series which is now in the **security fix** phase of its life cycle. See the [downloads page](#) for currently supported versions of Python and for the most recent source-only **security fix** release for 3.7. The final **bugfix release** with binary installers for 3.7 was 3.7.9.

Among the major new features in Python 3.7 are:

- PEP 554, new C API for thread-local storage
- PEP 545, Python documentation translations
- New documentation translations: *Japanese, French, and Korean.*
- PEP 552, Deterministic pyc files
- PEP 553, Built-in breakpoint()
- PEP 557, Data Classes

File Edit Format Run Options Window Help

```
print("hello world")
```
